

**AMANORA
SCHOOL**
Managed by Pearson

CIR/04/17-18

Date: 15/06/2017

Dear Parents,

Greetings from Amanora School!

We at Pearson schools constantly strive to develop unique skills in our children. One such initiative of ours is the Innovation lab which would be introduced to children from grades III to VIII during the academic year 2017-2018.

I am sure you will agree with me that innovation is the need of the hour, and to innovate one needs to develop an innovative mindset. The school through the innovation lab will be introducing children to projects that will help develop a Maker mindset, growth mindset and team mindset which is collectively called the innovation mindset.

Students of grades III to VIII will be trained to handle various equipment, prototyping tools while the schools ensures safety precautions related to their usage. Students will create vacuum cleaners, machines with a cycle, handle controller boards, programming and other inter disciplinary projects.

Students will be taken through entire making life cycle starting with design, selection of raw material, identifying the best possible process and thoroughly analyzing and finally creating. Students will be accessed on each project and a qualitative report on the child would be provided to parents during the PTM.

Innovation lab will help students convert their own ideas and thoughts into prototype.

Look forward to your enthusiasm and support in this endeavor as always.

Best regards,

For Amanora School
